Experience

Tech Lead Sodexo

Oct, 2022 - Now

Working at solutions for food tech and services fields, maintaining web and mobile native applications used across the globe. Helping to improve and migrate legacy code, implementing new features according to product team requirements.

Front-end Engineer BoostUp

Jan, 2022 - Aug, 2022

Creating new features for BoostUp product (a B2B product focused to provide accurate forecasts for companies, based on AI). I helped to create advanced and highly customizable dashboards, tables, widgets and charts, with a international teams across different time zones.

CTO Delloop

Feb, 2020 - Oct, 2022

Building the Delloop product with TypeScript and GraphQL, and the mobile app with Flutter>

Also coordinating the web team.

Clevertech consultant - Software Engineer Clevertech

Aug, 2019 - May, 2020

Working on Clevertech clients, with JavaScript/TypeScript.

Aubay consultant - Front-end Engineer TripAdvisor

Oct, 2018 - Aug, 2019

Working on internal tools and projects for the hotel's segment, using React, Redux, and correlated technologies, migrating legacy technologies to a new stack, or adding new features on current products.

Aubay consultant - Software Engineer OLX

Sep, 2017 - Sep, 2018

Software Engineer at OLX, working on a product for premium sellers on a vertical platform focused on cars sales in some European countries (Standvirtual in Portugal, Autovit in Romania, and Otomoto on Poland). The challenge here was to maintain legacy software (monolithic architecture, classical MVC with PHP) and at the same time work with new technologies (SPA, SSR, PWA, microservices architecture, etc.), migrating parts of the product from the legacy to the new platform, keeping in mind important items, like SEO.

Tech Lead & Full Stack Developer Planedia

Jun, 2013 - Jul, 2017

I worked on this startup since it was founded, working as a back-end, using Node.js/express/MongoDB, PHP/Laravel/MySQL and sometimes, at the front-end position, working with React & Redux. I also helped with the recruiting process to get new developers and taking technical decisions.

Front-end Engineer Liferay

Mar, 2012 - Feb, 2013

Allocated inside a Liferay customer (Leroy Merlin Brazil), I helped to upgrade the customer website, applying the most recent Liferay features and the Liferay best practices, and to convert it on e-commerce portal, able to sell more than 80.000 different products.

Front-end Engineer Record TV

Jan, 2011 - Mar, 2012

I worked on the blogs team, using WordPress. Involved in dozens of projects, I created blogs and sites for soap operas, reality shows, news programs, journalists, auditorium programs, etc. My mission was creating themes, plugins, and widgets for different projects. Previously, the company has contracted external partners for creating his projects. I started on a new blogs team (I was the third member). At the end of the year, we were more than 20 members. There were no more external partners working on projects because the sites and blogs were created and maintained by our team.

Back-end Developer Grupo Ser Educacional

Oct, 2008 - Feb, 2012

As a back-end developer, I worked on some educational software inside of this company. With more than 100.000 students around the country, the educational group needed software to the handle library books and books reservations, control financial data, students make enrolment, paying his monthly tuition, entrance exams, etc.

Courses

Bachelor of Computer Science Faculdade dos Guararapes

Jul, 2006 - Dropout

Mechatronics technician ETEPAM

Jan, 2008 - Dropout

Computer Technician IFMA

Jul, 2006 - Dropout

Electronics Technician IFMA

Jul, 2004 - Dropout

Open Source

Laravel bootstrap forms 4

<https://github.com/netojose/laravel-bootstrap-4-forms>

Laravel 5 package forms for bootstrap 4

Laravel 5 API REST explorer

<https://github.com/netojose/laravel-api-explorer>

API explorer for laravel applications
